## SRD991 Intelligent Positioner

These instructions are to be used as a guide for quick start-up. For more detailed information please refer to the standard documents "Master Instructions" and "Product Specification Sheet". These can be found on our Website www.foxboro-eckardt.com

Versions with LCD (and LEDs):
SRD991 - all versions -

## 1. MOUNTING TO ACTUATORS

During operation the flat side of the spindle 9 on the back of the positioner must always point towards the arrow 26. The working angle around this position is $\pm 45^{\circ}$.

MOUNTING TO LINEAR ACTUATORS
NAMUR Mounting - left hand -

## Feedback lever for linear actuators :

The carrier bolt $\boldsymbol{B}$ is in the slot of the feedback lever $\boldsymbol{A}$ and the compensating spring $\boldsymbol{F}$ touches the carrier bolt.

## Carrier bolt B:

1 threaded sleeve 2 Stud 3 coupling piece

## MOUNTING TO ROTARY ACTUATORS

- Do not tighten grub screw 4 against the thread of spindle 9 !
- When in use the flat side of the spindle 9 must move ( $0 \leftrightarrow 100 \%$ ) in front of the arrow 26.
- When the product temperature rises, the drive shaft 1 increases in length. Therefore, the rotary adapter 3 must be mounted so that approx. 1 mm ( 0.04 in .) of clearance results between the drive shaft 1 and the rotary adapter 3 . This is achieved by placing an appropriate number of washers 5 , on the feedback spindle 9 , before attaching the rotary adapter. Two washers should result in a clearance of 1 mm .

NAMUR Mounting - right hand -

Direct Mounting

Actuator, left turning

## 2. CONNECTIONS

Check before mounting fittings and cable glands if threads are matching, otherwise housing can be damaged. The letter " $G$ " on the housings marks that the pneumatic connections are in G1/4 (otherwise NPT).

Ground
Connect earth cable to screw \#1 or screw \#2 (in the electrical connection compartment).

Actuator, right turning

## PNEUMATIC CONNECTIONS

Air supply (s): 1.4 to 6 bar (but not more than the max. pressure of actuator), free of oil, dust and water !

Single acting, Direct mounting s supply y1, y2 pneumatic outputs

Single acting
(--) closed

Double acting

## 3. ELECTRICAL CONNECTIONS

The safety requirements of document EX EVE0001 as well as the requirements of PSS EVE0105 and MI EVE0105 for SRD991 must be observed!

### 3.2 Inductive Limit Switch

### 3.1 Setpoint

3.1.1 SRD991-xD (w/o communication) SRD991-xH (HART) SRD991-xE (FoxCom it1)

3.1.2 SRD991-xF (FoxCom it2)

3.1.3 SRD991-xP (PROFIBUS PA) SRD991-xQ (FIELDBUS FF)

### 3.2.1 SRD991-xxxT or U

Two-wire proximity sensors, Acc. to DIN 19234 or NAMUR

3.2.2 SRD991-xxxR

### 3.2.3 SRD991-xxxV

Warning: For connection of micro switches please refer to MI (Master Instruction) and respect the safety requirements described in document EX EVE0001.

### 3.3 Option Board

### 3.3.1 Two binary outputs (SRD991-xxP)

Two-wire system, acc. to DIN 19234 or switched output.
3.3.2 Two binary inputs (SRD991-xxB)

Binary inputs with internal supply for connection of sensors or switches (switch closed for a normal operation!)
3.3.3 Position feedback 4 to 20 mA and 1 Alarm (SRD991-xxQ ou SRD991-xxF)
Analog output 4 to 20 mA and Binary output Two-wire system acc. to DIN 19234 or switched.

Electric terminal B

3.3.4 Two binary in-loutputs (SRD991-xxE)

Two-wire system acc. to DIN 19234 or switched in-/output.

[^0]
4. START UP (Setting by means of local keys and LCD / LEDs)

After mounting the positioner on the actuator, air and electrical input connected, you can start-up the SRD. The SRD991 can be adjusted by means of a local key-pad and LCD / LED display.

Attention: Do not touch behind the positioner housing while operating the keys! DANGER OF INJURIES!

## Description of display

Process variable

| $87.5 \%$ |
| :---: |
| Valve position |

Process variable and diagnostics

| $87.5 \%$ |
| :---: |
| Valve position |
| ctrl diff error |

At configuration: Main menu

```
SRD Main Menu
1 Mounting
2 Autostart
3 Valve Action
```

At configuration the selected item is displayed with dark background.
Further menus with (UP) key.

## Configuration and operation with push buttons and LCD:

An already configurated device may show the following display:

| $87.5 \%$ |
| :---: | :---: |
| Valve position |

For configuration press (M) and main menu appears.

If the SRD wasn't configurated yet, the Main menu*) appears automatically after power-up:

| SRD Main Menu |  |
| :--- | :--- |
| 1 | Mounting |
| 2 | Autostart |
| 3 | Valve Action |

In menu 1 you can select the type of mounting.

Push buttons

## and LED display:

An already configurated device is INOPERATION after power up, and all LEDs are off.

For configuration press (M), and LEDs 'M/F' and ' 1 ' flash (= menu 1 is offered).

If the SRD wasn't configurated yet, menu 1 is offered automatically after power-up:

In menu 1 you can select the type of mounting.

[^1]... and LCD: ... and LED display:
Press keys (UP)+(DOWN) simultaneously to enter menu 'Type of mounting'. Select the 'Type of mounting' by pressing (UP) or (DOWN).

(Further menus with (UP) key.)

Lin.actuator, left-hand mount.
Lin.actuator, right-hand mount.
Rotary actuator, opening ccw Rotary actuator, opening cw

Press keys (UP)+(DOWN) simultaneously to confirm and save.
The SRD moves back to menu level 1 and is in main menu again.

| SRD Main Menu |  |
| :--- | :--- |
| 1 | Mounting |
| 2 | Autostart |
| 3 | Valve Action |

To enter next menu (= menu 2, AUTOSTART) press (UP) once.

```
SRD Main Menu
1 Mounting
2 Autostart
3 Valve Action
```

To enter next menu (= menu 2, AUTOSTART) press (UP) once, and the LEDs ' $M$ ' and ' 2 ' flash.

Press keys (UP)+(DOWN) simultaneously to enter menu 'Autostart'. Select Full or Short autostart* by pressing (UP) or (DOWN).

| 2 Autostart |
| :--- |
| 2.1 Endpoints |
| 2.2 Standard |
| 2.3 Enhanced |

Different Autostart options are available:

### 2.1 Endpoints

Determines only the mechanical stops of actuator/valve

### 2.2 Standard

Autostart recommended for standard application.

### 2.3 Enhanced

Enhanced Autostart. Optimized control behaviour compared to Standard Autostart.

### 2.4 Smooth resp.

Extended Autostart. Dampened control behaviour for e.g. smaller actuators.

### 2.5 Fast resp.

Extended Autostart. Undampened control behaviour for e.g. larger actuators.
Press keys (UP)+(DOWN) simultaneously to confirm and to launch Autostart.
The automatic adaptation to the valve is composed of a sequence of steps, explained on the LCD or indicated by the LEDs.
Following the last step the device is IN OPERATION.-

## Menustructure for SRD991/SRD960 with LCD

| SRD Main Menu |  |  |
| :---: | :---: | :---: |
| Menu | Factory | Description |
|  | CO |  |
| 1 Mounting |  |  |
| 1.1 Lin left | $\checkmark$ | Linear actuator, left-hand or direct mounting |
| 1.2 Lin right |  | Linear actuator, right-hand mounting |
| 1.3 Rot cclockw |  | Rotary actuator, opening counter-clockwise |
| 1.4 Rot clockw |  | Rotary actuator, opening clockwise |
| 2 Autostart |  |  |
| 2.1 Endpoints |  | Adaptation of the mechanical stops only |
| 2.2 Standard |  | Autostart recommended for standard application |
| 2.3 Extended |  | Enhanced Autostart. Optimized control behaviour compared to Standard Autostart |
| 2.4 Smooth resp. |  | Extended Autostart. Dampened control behaviour for e.g. smaller actuators |
| 2.5 Fast resp. |  | Extended Autostart. Undampened control behaviour for e.g. larger actuators |
| 3 Valve Action |  |  |
| 3.1 SRD |  |  |
| 3.1.1 Direct | $\checkmark$ | Valve opens with increasing setpoint value |
| 3.1.2 Reverse |  | Valve closes with increasing setpoint value |
| 3.2 Feedback |  |  |
| 3.2.1 Direct | $\checkmark$ | Increasing Current with increasing valve position |
| 3.2.2 Reverse |  | Decreasing Current with increasing valve position |
| 4 Character |  |  |
| 4.1 Linear | $\checkmark$ | Linear characteristic |
| 4.2 Eq Perc 1:50 |  | Equal percentage characteristic 1:50 |
| 4.3 Quick open |  | Inverse equal percentage characteristic 1:50 (quick opening) |
| 4.4 Customer |  | Custom characteristic |
| 5 Limits/alarms |  | Not locally available with LED versions of communication FF and Profibus |
| 5.1 Lower limit | 0 \% | Closing limit is set to input value |
| 5.2 Cutoff low | 1 \% | 0\%-tight sealing point is set to input value |
| 5.3 Cutoff high | 100 \% | 100\%-tight sealing point is set to input value |
| 5.4 Upper limit | 100 \% | Opening limit is set to input value |
| 5.5 Splitr 0 \% | 4 mA | Split range 0 \%: input value corresponds to 0 \% |
| 5.6 Splitr $100 \%$ | 20 mA | Split range 100 \%: input value corresponds to $100 \%$ |
| 5.7 Lower Alarm | -10 \% | Lower position alarm on output 1 is set to input value |
| 5.8 Upper Alarm | 110 \% | Upper position alarm on output 2 is set to input value |
| 5.9 Valve 0\% | 4 mA | Configuration of rated-stroke of 0\% at 4 mA |
| 5.10 Valve 100\% | 20 mA | Configuration of rated-stroke of 100\% at 20 mA |
| 5.11 Stroke Range | $\mathrm{x}^{\circ} / 20 \mathrm{~mm}$ | Configuration of nominal travel |
| 5.12 Units | SI | Configuration of temperature and pressure unit SI or Anglo US |
| 6 Parameters |  |  |
| 6.1 Gain closing | 15 | P: Proportional gain for 'close valve' |
| 6.2 Gain opening | 2 | P: Proportional gain for 'open valve' |
| 6.3 Res time cl | 7.5 | I: Integration time for 'close valve' |
| 6.4 Res time op | 2.4 | I: Integration time for 'open valve' |
| 6.5 Rate lim cl | 0.35 | T63: Setting time for 'close valve' |
| 6.6 Rate lim op | 0.35 | T63: Setting time for 'open valve' |
| 6.7 Control gap | 0.1 | Permitted neutral zone for control difference |
| 7 Output |  | Manual setting of IP-Module for testing of pneumatic output |
| 8 Setpoint |  | Manual setting of valve position |
| $8.112 .5 \%$ Steps |  | Setpoint changes of 12.5\% steps by using push buttons Up or Down |
| $8.21 \%$ Steps |  | Setpoint changes of 1\% steps by using push buttons Up or Down |
| 8.3 Do PST |  | Start Partial Strok Test |

[^0]:    * For intrinsically safe circuits please refer to certificate / data label for max. operating voltages etc

[^1]:    *) On delivery the menu language in the display is English. The menu language can be changed over to another stored language. For this select 9.8.2 [german] or 9.8.3 [as ordered] and confirm with keys (UP)+(DOWN) (simultaneously). Leave menu by repeated pressing of (M) key.
