

# **VALVE BODY W15 TYPE T MINI TRI-CLAMP**

ART. NO. 860001

### **GENERAL**

The KEOFITT CLASSIC W15 Sampling Valve is designed for high viscosity sampling such as fruit pulp etc.. Design based on the original KEOFITT and based on one-piece-construction. Unique serial no. for each valve\*.

The sampling valve can be used for any process sampling for microbiological, chemical and/or physical analysis.

Cleaning/sterilizing: Between batches: Valve in open position: Cleanable by means of CIP using the detergent solution suitable for the actual process media. Between samples: Valve in its normal closed position: cleanable by CIP as "Between batches" or the valve may be sterilized by means of steam SIP or chemical SIP using a procedure appropriate to the actual circumstances. For further advice, please contact Keofitt.

Designed for sampling of liquids with a viscosity of up to approx. 50.000 cP containing no particles larger than Ø8 mm. Sampling of more viscous liquids is possible, only will it take longer (depending on process pressure).
