

WORCESTER CONTROLS F519/529/819/829
Full Bore Fire Safe Flanged Ball Valves

Experience In Motion

The Flowserve Worcester flanged full bore valve range provides customers with specification compliant product with long service free life resulting in low cost of ownership. All valves comply with the requirements of ASME B.16.34 with a one piece 519/529 design up to 1½" and the two piece design extending the range from 2" to 8"

Anti-blowout stem

Inserted from inside of valve body for greater safety

Actuator Mounting

Conforms to ISO 5211 for ease of actuation

Anti-static stem design

Ensures electrical continuity between ball and body

Ball

Parallel ported 316 stainless steel as standard with pressure equalizing hole to balance cavity pressure when the valve is open

Body seals

PTFE with metal to metal secondary seal on one-piece valves and PTFE coated graphite on two piece eliminating potential media contamination whilst providing fire rated integrity

Gland packing

Graphite provides fire rated integrity and combined with the body seals ensures Fugitive Emission compliance to ISO 15848

Wrench

Ergonomically designed tamper proof lockable design on one-piece valves and multi position fit wrench on two-piece valves to suit space requirements

Locking clip

Maintains position of gland nut during actuation for long leak-free performance

Actuation

Valve assembled ready for actuation with no changes to stem build required maintaining valve integrity

Bolting

Stainless steel as standard meeting the requirements of ASME VIII Div 1 pressure vessel codes

Locking Device

Tamper proof design ensures the padlock cannot be removed or over-ridden when locked either open or closed (North America & Canada only)

Parts/Materials List

Item	Description	Material
1 & 2	Body & Insert/Connector	Stainless Steel ASTM-A351 CF8M Low Temp Carbon Steel ASTM-A352 LCB
3	Ball	Stainless Steel A479 316, ASTM-A351 CF8M
4	Stem	Stainless Steel A479 316
5	Seat	TFE Virgin, Polyfill (see page 6)
6	Body Seal	PTFE / PTFE Coated Flexible Graphite
7	Body Connector Screw	Stainless Steel ASTM A193M, B8 CL2/B8M CL2
8	Stem Thrust Seal	TFE, Polyfill
9	Secondary Stem Seal	TFE
10	Gland Packing	TFE, Flexible Graphite
11	Stem location ring	Stainless steel 316
12	Indicator Stop	Stainless Steel
13	Gland	Stainless steel 316

Item	Description	Material
14	Gland nut	Zinc Plated Stainless Steel, Carbon Steel
15	Gland Nut Locking Clip	Stainless Steel
16	Stop Pin	Stainless Steel
17	Wrench	Stainless Steel, Carbon Steel
18	Wrench Head	Stainless Steel, Carbon Steel
19	Wrench attachment Bolt	Stainless Steel, Carbon Steel
20	Anti-static Spring & Plunger	Stainless Steel
21	Locking /device	Stainless Steel
22	Washer	Stainless Steel
23	Lockwasher	Stainless Steel
24	Washer	Stainless Steel
25	Nut	Stainless Steel

Pressure/Temperature Ratings

TFE SEATS (T)

Virgin PTFE is the most common sealing material and is suitable for almost all media as it has excellent chemical resistance.

POLYFILL / FLUOROFILL (P)

Carbon and graphite filled PTFE material an excellent seat material for higher pressure and temperature applications.

KEY: A = Carbon steel body rating B = Stainless steel body rating

Pressure Torque Curves

519/529 TFE & POLYFILL SEATS

819/829 TFE & POLYFILL SEATS

Note: Please apply safety factors as recommended in the Worcestor Controls Actuator Sizing Manual

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Operation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
