Certificate of Conformance

Subject: Worcester WK Series Valves

The Flowserve Corporation hereby certifies that the virgin PTFE, virgin TFM and Polyfill (seats) articles and components used in the manufacture of the Worcester WK series product line have been tested in accordance with USP protocol, and all meet the requirements of USP Class VI plastic. Also, said materials have been tested in accordance to regulations of 21 CFR 177.1550 and found to comply. Therefore, these products may be safely used in areas intended to contact food or similar products.

Any question should be referred to the product group of the Flowserve Corporation, Flow Control Division, Cookeville Valve Operation located in Cookeville, Tennessee.
